

A decorative header consisting of several thin, curved lines in shades of purple, blue, green, and yellow. A small blue asterisk is positioned near the top center.

# S60 Applications

Success Case: Birdstep

# Birdstep enables WiFi-GSM roaming for S60 3<sup>rd</sup> Edition devices

- Seamlessly roam between GSM and WiFi data networks
  - Automatically switches between network connections based on user preferences
- Takes advantage of new network features of Nokia S60 3<sup>rd</sup> Edition and Series 80 devices

***“We are very excited about the prospects that S60 3rd Edition devices hold for our software. Consumers, for example, may be playing an online game at their local WiFi hotspot, and then board a taxi and continue playing without a network interruption. In essence, the whole world becomes one network.”***

— Stefano Holquin, Vice President of Marketing, Birdstep Technology
